

**Tron [VHS, 0199]****Date: 2005-09-10 17:40:19**

Computer Classic, one of the first computer generated movies. A hacker is split into molecules and is transported into a computer. In this computer a mean program called Master Control behaves like a dictator. The hacker, who programmed a number of features of the environment he got into, teams up with a book keeping program and his girl-friend and together they try to replace Master Control with Tron. Tron is an honest safety system.
